# Promethean: The Created

## Synopsis

I know that look of disgust in your eyes. You can't hide it from me. I've seen all its expressions in many faces like your own. I am intimately familiar with rejection. Yes, these scars and stitched wounds are horrifying to behold. Were I truly alive, they'd be enough to kill me. But I am not alive. Not yet. Not in the way you know it. A fire burns within me and animates this dead flesh, these legs that have wandered the far regions of the Earth, these hands that have killed men. And I walk with a purpose. You will not stand in my way. These hands have killed men. A Storytelling Game of Stolen Lives • Prometheans are soulless corpses animated by a mysterious, alchemical force â • the Divine Fire stolen from the gods. Their hideousness forces humans, animals, and even nature itself to reject them on an instinctual level. They wander the dark places of the world, seeking what their creators denied them: humanity. A New Game set in the World of Darkness â ç A whole new type of character for players, inspired by the classic Frankenstein monster and the worldwide myths of Golems â ç Explores aspects of the World of Darkness unknown to the other game lines â ç Strange new antagonists and mysteries to unravel for players of any World of Darkness game US Page Count: 288 (hardcover). Authors: Bill Bridges, Justin Achilli, Alan Alexander, Conrad Hubbard, Carl Bowen, Matt McFarland, Howard Ingham, Joseph Carriker, Rick Chillot. Developer: Bill Bridges

## Customer Reviews

Promethean The Created is a new hardcover book for use with White Wolf's mega-popular World of Darkness RPG, and represents a broad new canvas for fans of the game. Promethean offers a new

type of character to build and play...soulless corpses, reanimated with life and representing pure Greek Tragedy in their scope, or pure gothic horror...or maybe even both to players. The book bases its background on the myths of things such as the Frankenstein monster, golems, and other such constructs. First, the book does a fantastic job of providing background on these creatures as well as source books and films, giving players a wide array of options. These created need not be pieced-together bodies of corpses. As pointed out, even creatures such as DC Comics' The Swamp Thing are considered a created being. Chapter One is vital and provides the player and GM with the setting and background for Prometheans. This is very key as the background of these characters is perhaps more important than any other type of WOD character. All manner of sample Prometheans and methods of creation are included...from alchemical to electricity to primordial beings. You'll find yourself mesmerized for hours by the depth of research done by the game designers. I'm not sure how much of this will ever be used, but it makes for interesting reading nonetheless. After you've read about these various types of constructs, chapter two will not get you into the character creation phase. Let's just say there's a heck of a lot more to do here than rolling a few dice. Select the character's attributes, skills, specialties, features, and various advantages. There are some excellent examples provided to get players moving in the right direction in creating their Prometheans.
