# Mindscape: Book 2 Of The New Frontiers Series

## Synopsis

New to the series? Get Book 1 here: [smarturl.it/excelsior](http://smarturl.it/excelsior) PEACE ON EARTH BROUGHT A WAR FROM SPACE  
Thirty years after The Last War, Admiral Alexander is back in the Navy. Soon after taking command of an aging battleship, he intercepts an unidentified comm transmission over the dark side of the Moon. It's a dire warning and a threat from an old Confederate Captain, but no demands were made, and this old enemy doesn't look or sound entirely human. Minutes after receiving the transmission, missiles are spotted on approach for Lunar City. They're moving at a third of the speed of light. Far too fast to intercept. Lunar City is obliterated, leaving nothing but a crater in its wake. Immediately following the attack, Alexander intercepts another mysterious transmission: "This is only the beginning..."

## Book Information

File Size: 938 KB

Print Length: 388 pages

Simultaneous Device Usage: Unlimited

Publisher: Anthem Press; 2nd edition (September 6, 2016)

Publication Date: September 6, 2016

Sold by: Digital Services LLC

Language: English

ASIN: B01LQT3FTG

Text-to-Speech: Enabled

## Customer Reviews

I was offered a sample copy of this book in exchange for an Honest Review. Having read many of this Author's prior works I was thrilled with the opportunity to be an early reader of his newest novel. Not only is this a great book totally deserving of the Five Star rating but it is so timely

as we introduce more and more Virtual Reality (VR) into our lives as well as rapid advances in Artificial Intelligence (AI). The title of this book ("Mindscape") is great and once you begin to read you'll understand this is an interesting name for the Virtual Reality (VR) World where much of this story takes place. Artificial Intelligence (AI) is introduced and for a while I thought this would be the rare book that didn't foresee "Evil Machines Take Over". No, It's much more like "The road to Hell". The main AI character is similar to my wife who is no longer allowed in the kitchen when I do the cooking. She (also, like the AI in the book) has "Good Intentions" BUT, having formerly been the cook in our family, has very strong feelings about HOW this cooking should be done. Her method of "helping" feels a lot like: "Don't you think you should do this, or, not do that, or, use this or that, etc., etc.." I thought she could help by doing specific tasks like set-the-table BUT, once she sees something not being done "the right way" she is compelled to "HELP". The AI in this story also wants to "HELP". If you feel the same way I do about: "I was only trying to Help", you'll understand. I hate to give away endings or even try to give a synopsis of a book, I believe the authors do a splendid job of this, better than I could. Instead, I prefer to tell you What I liked about a book (and Why).
