# The Total Synthesis Of Natural Products, Volume 8

## Synopsis

Organic chemistry's innovative breadth is especially noteworthy in the area of natural products synthesis. Since the early 1970s, this landmark chemical reference has been documenting the newest and most important of these, in a readily understood format, that clearly traces each of their synthetic routes. Volume Eight, the latest in the series, contains a long-awaited look at the synthesis of tri- and tetracyclic diterpenes, along with the synthesis of naturally occurring quinones. Recent interest in the biologically important polysaccharides has led to a detailed consideration of that compound class. Finally, this new volume contains a look at the strategies and methods specific to natural products containing the spiroketal functional group. The Total Synthesis of Natural Products, Volume Eight, continues the meticulous work of the series, providing chemists with an entirely up-to-date and convenient guide to the critical new syntheses essential to organic chemistry's continuing evolution.

## Book Information

Series: Total Synthesis of Natural Products (Book 8)

Hardcover: 720 pages

Publisher: Wiley-Interscience; 1 edition (January 24, 1992)

Language: English

ISBN-10: 0471545074

ISBN-13: 978-0471545071

Product Dimensions: 6.3 x 1.5 x 9.2 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)
