Psychology And Religion: Classical Theorists And Contemporary Developments

Synopsis

This book articulates a broad range of theoretical viewpoints, both classical and contemporary, in the field of the psychology of religion. Chapters One through Eight are overviews of such 'classical' theorists as William James, Sigmund Freud, Carl Jung, Gordon Allport, Abraham Maslow, Alan Watts, Erich Fromm, and Viktor Frankl. Chapters Nine through Twelve consider subsequent developments in the field, e.g., the views of object relations theorists on the God-image; empirical research on the scaling of religiousness; and modern consciousness research. Chapters Ten through Twelve are new to this edition and comprise an eclectic overview of the feminist psychology of religion, recent developments in the intersection of neuroscience and religion, and the evolutionary psychology of religion. Both wide-ranging and current, therefore, this book offers illuminating and in-depth coverage of major theorists and approaches. While its breadth makes it an excellent place to begin an exploration of the psychology of religion, its depth and detail provide the opportunity for a serious and rewarding immersion in the field.

Book Information

Paperback: 382 pages

Publisher: Rowman & Littlefield Publishers; 4 edition (November 27, 2007)

Language: English

ISBN-10: 0742560228

Customer Reviews

If you are looking for a good overview of thought on this topic, this is an excellent book to have. I used it for a research paper and ended up getting my own copy to have on hand. Best volume I've found if you want to know what 8 major minds in the field of psychology said on this subject, along with other theories and new developments. For good information organized in one place look no further. An excellent reference book and an interesting read.

This thing is serious college level reading. At some points I didn't understand what the author was trying to say because he was using such advanced language. If this book were not a requirement for my class, I would never have bought it. It's a shame because it means only more educated people with a lot of time and patience to try and reread each chapter will really understand this. I don't fully agree with any of these guys in this book, but it seems they would all agree that bad religion forgets to take human experience into account, and good religion is meant to focus on achieving higher human potentials. I would also say that these theorists agree that humanity needs a new open-minded, non-judgemental way of looking at the human experience that is life and to take into account what it really means. Just saved you lots of reading.

required reading for school. Big eye opener

Put quite simply, this is the worst book I have ever had the painful experience of enduring. This book, while grammatically correct, has the worst sentence structure and syntax I have ever seen. Bar none. Meant to be a book to teach and instruct, it turns out to be a book that is infuriating, frustrating, and irritating. The author does an absolutely abysmal job of conveying meanings and interpretations of the original psychologists. He convolutes, overstates, and ruins any useful ideas by turning them into his own over written babbling. It seems this author was more concerned with spouting his ideas and awful language than he ever was about teaching anything. He has done a serious disservice to students with this monstrosity. Throughout the period I had to read this book, I found myself yearning for a even a 5 minute break to return to organic chemistry, or history texts. I would, quite literally, rather press tacks into my skin than read this abomination. I know I not alone in these feelings either, having found similar viewpoints from all of my fellow classmates. Do yourself a favor. Do anything in your power to avoid reading this book.
