Bioorganic Photochemistry, Photochemistry And The Nucleic Acids (Volume 1)

Synopsis

This book is the first in the series and is a review of the ways in which ultraviolet and visible light affect the nucleic acids. It includes changes caused by excitation of the nucleic acids themselves as well as reactions caused by photoexcitation of other reagents in the presence of nucleic acids. Ultraviolet light is a known carcinogen, has been recently used for phototherapy of cancer, and has been used for "photoaffinity labelling" of biological molecules. This volume will help the reader to understand these and other photoinduced phenomena as they relate to the nucleic acids.

Book Information

Series: Bioorganic Photochemistry (Book 1) Hardcover: 437 pages Publisher: Wiley-Interscience; Volume 1 edition (April 1990) Language: English ISBN-10: 0471629871 ISBN-13: 978-0471629870 Product Dimensions: 6.4 x 1 x 9.6 inches Shipping Weight: 1.6 pounds Average Customer Review: Be the first to review this item Best Sellers Rank: #8,360,008 in Books (See Top 100 in Books) #94 in Books > Science & Math > Chemistry > Photochemistry #6653 in Books > Science & Math > Chemistry > Organic #13796 in Books > Engineering & Transportation > Engineering > Bioengineering > Biochemistry
