Photocatalytic Production Of Energy-Rich Compounds (Energy From Biomass ; 2)

Synopsis

This workshop comprises part of the four-year (1985-1988) non-nuclear energy R & D programme for the development of renewable energy sources which is being implemented by the Commission of the European Communities. The aim of the workshop was to present work by the contracting laboratories in addition to work by numerous other research laboratories in 11 European countries. Extensive discussions were also held on the present state of this basic, directed research in photochemistry, photoelectrochemistry and photobiology, and where the future emphasis may usefully lie. Thus the book presents the proceedings of all the papers presented and summarizes the recommendations made by the participants as to where future research support may be most effectively placed. It was emphasized in these recommendations that the interdisciplinary collaboration between photochemistry and photobiology had been quite successfully achieved in this European programme. There were both high quality basic research and practical benefits accruing from the work, and these are described in the report on proposed areas for future research.

Book Information

File Size: 8120 KB

Print Length: 268 pages

Simultaneous Device Usage: Up to 4 simultaneous devices, per publisher limits

Publication Date: April 16, 2007

Sold by: Digital Services LLC

Language: English

ASIN: B000PWQTL2

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Best Sellers Rank: #3,143,445 Paid in Kindle Store (See Top 100 Paid in Kindle Store) #88

in Books > Science & Math > Chemistry > Photochemistry #958 in Kindle Store > Kindle

eBooks > Nonfiction > Science > Biological Sciences > Biochemistry #2105 in Books >
