# Photochemical Purification Of Water And Air: Advanced Oxidation Processes (AOPs) - Principles, Reaction Mechanisms, Reactor Concepts

## Synopsis

While the treatment of water and exhaust gas using ultraviolet (UV) light offers both ecological and economic advantages, information on photo-initiated advanced oxidation technologies (AOTs) has been dispersed among various journals and proceedings until now. This authoritative and comprehensive handbook is the first to cover both the photochemical fundamentals and practical applications, including a description of advanced oxidation processes (AOPs) and process engineering of suitable photoreactors. The author presents various real-world examples, including economic aspects, while many references to current scientific literature facilitate access to current research topics relevant for water and air industries. Throughout, over 140 detailed figures visualize photochemical and photophysical phenomena, and help in interpreting important research results. From the foreword by James R. Bolton (President of Bolton Photosciences Inc., Executive Director of the International Ultraviolet Association (IUVA)): "Prof. Oppenländer is well qualified to write about the AOPs/AOTs, since he has contributed to this literature in a very significant manner. This book will be of considerable value to graduate students, science and engineering faculty, scientists, process engineers and sales engineers in industry, government regulators and health professionals."

## Book Information

Hardcover: 383 pages

Publisher: Wiley-VCH (February 3, 2003)

Language: English

ISBN-10: 3527305637

ISBN-13: 978-3527305636

Product Dimensions: 7 x 0.9 x 9.8 inches

Shipping Weight: 1.9 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #1,670,376 in Books (See Top 100 in Books) #12 in Books > Science & Math > Chemistry > Photochemistry #455 in Books > Science & Math > Chemistry > Physical & Theoretical > Physical Chemistry #580 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Environmental > Water Quality & Treatment
