Introduction To Mammalian Reproduction

Synopsis

Introduction to Mammalian Reproduction is a welcome contribution to the fields of gametogenesis, gamete transport, fertilization, and reproduction technologies. Key topics covered include: *formation and maturation of male gametes; *morphology and physiology of female gametes; *how the sperm meets the egg; *sperm-egg fusion, egg activation, and implantation of fertilized egg; *assisted reproduction and environmental chemicals that have an effect on formation and function of male and female gametes. This book is for both researchers and students involved in reproductive biology.

Book Information
