Blackwell's Five-Minute Veterinary Consult Clinical Companion: Canine And Feline Infectious Diseases And Parasitology

Synopsis

Blackwell's™ Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology, Second Edition takes a user-friendly alphabetical format to cover a wide spectrum of canine and feline infectious diseases and parasite-related disorders. Part of the popular Five-Minute Veterinary Consult series, it includes information on many specific organisms and diseases, from amebiasis and Ehrlichiosis to rabies and ticks. The text also provides extensive differential diagnostic lists, as well as information on drugs, dosages, toxicity, treatment options, diagnostic testing, immunization recommendations, and cytological appearance. The Second Edition presents three new chapters on canine influenza, sarcoptic mange, and staphylococcal pyoderma. Blackwell's™ Five-Minute Veterinary Consult Clinical Companion: Canine and Feline Infectious Diseases and Parasitology, Second Edition is an ideal quick reference for veterinary professionals and students.

Customer Reviews

I've gone through several iterations of Georgi's parasitology - always found it difficult to find what I needed quickly. This is a very handy reference - well organized, concise, easy to find the info you need quickly. Good companion to the more in-depth references like Greene's and Georgi's. I had Dr. Barr as a professor in school - the book is organized much like his lectures. He's great at getting to the bones of what you really need to know in general clinical practice.

The book covered a lot of topics. However I was specifically interested in autoimmune diseases and their relationship to tickborne illness in golden retrievers.

This is a great reference. It lays out infectious diseases, their symptoms, detection, and treatments, far better than many/most academic textbooks. It's well organized. Colors pics are great and helpful. Highly recommended.
