Divination: Beginner's Guide To Understanding The Basics Of Divination & Discovering The Power Of Spirituality (Divination , Pendulum Dowsing, Psychic Development, Tarot, Runes, Yoga)

Synopsis

Choose your best path through life with using Divination Free Bonus Included Inside!!!! Discover how divination can shape your fate. The desire to know our true origins, the purpose for our existence, and what our futures hold is a universal human trait. In response to it, almost every culture has developed its own system of divination. Understanding Divination is a guide to astrology, numerology, tarot, runes, and the I Ching. In passing up the chance to learn about these five classic divination systems, you miss your opportunity to connect with your higher self and receive invaluable practical guidance that will help you fulfill your highest potential. The purpose of this book is to explain the origins and mechanics of the five classic divination systems and tells you how to harness your intuition in order to make the most of them. These systems will enable you to stop being a helpless victim of fate by revealing all of your possible life paths and allowing you to choose your destiny for yourself. Despite centuries of suppression and opposition, astrology, numerology, tarot, runes, and the I Ching have endured and reached peak popularity. This is because they provide people of all cultures with profound insights into their own nature and the nature of the world, giving us a sense of belonging and purpose that are more valuable than material wealth. In refusing to take advantage of these systems, you deny yourself the opportunity to bridge the gap between intellect and intuition and develop the ability to solve problems that are beyond the scope of logic and reason.

Customer Reviews

A fantastic introduction into divination, and one I'll recommend to my students. A must read for beginner witches, or those just getting into divination. The only thing I wish is that there was a bibliography so I could explore the author's primary sources, but the text is detailed enough that I can research it on my own.

Very interesting book. This book will give you all the great insights about divination and the origins of the five classic divination systems, that I didn't know!. I would definitely recommend it to anyone who has an interest in divination and wants to learn more.

So cool!
