# The Donors' Dilemma: Emergence, Convergence And The Future Of Foreign Aid (Global Policy E-Books Book 1)

## Synopsis

As poverty declines, what if the remaining pockets of poverty are increasingly focused in countries where aid is already on the way to becoming irrelevant as domestic resources grow - such as some middle income countries - or in countries which cannot absorb aid easily and quickly - meaning many fragile states? This is the question addressed by contributors to Global Policy's first e-book entitled 'The Donors' Dilemma: Emergence, Convergence and the Future of Aid', guest edited by Dr Andy Sumner, Co-Director, King's International Development Institute, King's College London, and Tom Kirk, Researcher at the London School of Economics and Political Science.
