## Synopsis

## Customer Reviews

What is it about a ghost story that draws one in? Few people truly believe that headless ghosts haunt Celtic castles, that restless spirits chase the shadows in every abandoned old farmhouse. Most of us go through life, not observing what was not meant to be observed. Yet, then I open up a book, one that skillfully crafts these stories, based on history, and question everything I believe. After finishing *Bones in the Basement*, a book I could not put down all day, in a darkening room, the light

dancing on a glass bottle or two, the taste of smoke and the moors on one's tongue, one can't help but summon up the genuine wonder for those things that are never truly explained. I believe that despite our outward desire for explanation and logic, most members of the public would rather tell stories of haunted trestles than listen to a litany of logic. For despite our modern conveniences, our science and technology, can we not be surprised that modern man still feels that shadowed belief in spirits, haunting those places in which they were once so affected, when we ourselves scarcely separate ourselves from past lives and past longing, ever hovering over bygone times and all their emotions, in late night, darkened hours, lingering in the past places in which we were loved. Hoping in the dark misty hills of our hearts, we will remember and be remembered. As Shakespeare said: We are such stuff as dreams are made on, and our little life is rounded with a sleep. Thank you Joni " for crafting a wonderful story, rooted in not just legend but in real lives and doing so with a skill that makes us all remember. As an author I know how difficult it can be to create such a work, engaging readers of all backgrounds, and you did so wonderfully.
