Advances In Heterocyclic Chemistry: 98

Synopsis

Established in 1960, *Advances in Heterocyclic Chemistry* is the definitive serial in the area "one of great importance to organic chemists, polymer chemists, and many biological scientists. Written by established authorities in the field, the comprehensive reviews combine descriptive chemistry and mechanistic insight and yield an understanding of how the chemistry drives the properties.*

Provides up-to-date material on a fast growing and highly topical subject area * Contains the latest research covering a wide variety of heterocyclic topics * Written by leading authorities and designed as a handbook for students and industry and academic researchers
