# An Engineer's View Of Human Error

## Synopsis

Third Edition Includes more examples of accidents caused by the various types of human error. It suggests to engineers how they might approach this problem, and does so by describing accidents, which at first sight seem to be the result of human error. IChemE, the Institution of Chemical Engineers, is the center for chemical, biochemical and process engineering professionals worldwide. We are the heart of the process community, promoting competence and a commitment to sustainable development, advancing the discipline for the benefit of society and supporting the professional development of members. Some of the areas we publish in include: -Safety in the process industries - the BP Process Safety series-Consultancy for chemical engineers-Project management in the process industries-Contract management in the process industries - International Forms Of Contract series-Communication skills for engineers --This text refers to an out of print or unavailable edition of this title.
