The Behaviour Of The Domestic Cat

Synopsis

Describing feline behavior from both a mechanistic and functional approach, this textbook provides an accessible overview of this fascinating subject. The book begins by addressing physiological, developmental and psychological aspects, with chapters on domestication, the development of the senses, learning, communication and feeding behavior. The authors then build on this foundation to discuss social behavior, hunting and predation, cat-human interactions and welfare. Fully updated throughout, this new edition also includes two new chapters on behavioral disorders due to pathologies and from misdirected natural behavior.

Book Information

Paperback: 264 pages

Publisher: CABI; 2 edition (January 9, 2013)

Language: English

ISBN-10: 1845939921

Customer Reviews

This is highly technical and scientific look at cat behavior. It will be a bit dry and heavy for someone who is not a vet, vet tech, or professional behaviorist. For those "in the business", it is a must.

Excellent book for professionals working with cats or anyone that wants to learn more about the most up to date research on cat behavior.

Great book very informative. Very dense though.

How can (or anyone) possibly justify the listed price for this PAPERBACK book? It's just as bad on .uk. I'm currently reading Bradshaw's "Cat Sense" -- a very interesting, informative, and reasonably

priced book. I would love to acquire this one, too, but not at the cost of my firstborn!(Star rating based strictly on ridiculous price.)
