Investing Polymer Science: Staudinger, Carothers, And The Emergence Of Macromolecular Chemistry (Chemical Sciences In Society Series)

Synopsis

Polymer science is central to material and intellectual life in the 20th century. Polymer chemistry and engineering have led not only to such substances as synthetic fibers, synthetic rubber, and plastic, but also to discoveries about proteins, DNA, and other biological compounds that have revolutionized Western medicine. In *Inventing Polymer Science*, Yasu Furukawa explores the history of modern polymer science by tracing its emergence from macromolecular chemistry, its true beginning. Furukawa's lively book gains human interest through its focus on two central figures, Hermann Staudinger and Wallace Carothers. He examines the origins and development of their scientific work, illuminates their different styles in research and professional activities, and contrasts the peculiar institutional and social milieux in which they pursued their goals. In the process he provides us with a richly contextualized history of the emergence of macromolecular chemistry.

Book Information

Series: Chemical Sciences in Society Series

Hardcover: 310 pages

Publisher: Chemical Heritage Foundation (June 9, 2005)

Language: English

ISBN-10: 0812233360

ISBN-13: 978-0812233360

Product Dimensions: 9.3 x 6.4 x 1.1 inches

Shipping Weight: 1.6 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #3,489,724 in Books (See Top 100 in Books) #75 in Books > Science & Math > Chemistry > Polymers & Macromolecules #2406 in Books > Science & Math > Chemistry > Organic #14761 in Books > Science & Math > History & Philosophy
