Princeton Readings In Islamist Thought: Texts And Contexts From Al-Banna To Bin Laden (Princeton Studies In Muslim Politics)
This anthology of key primary texts provides an unmatched introduction to Islamist political thought from the early twentieth century to the present, and serves as an invaluable guide through the storm of polemic, fear, and confusion that swirls around Islamism today. Roxanne Euben and Muhammad Qasim Zaman gather a broad selection of texts from influential Islamist thinkers and place these figures and their writings in their multifaceted political and historical contexts. The selections presented here in English translation include writings of Ayatollah Khomeini, Usama bin Laden, Muslim Brotherhood founder Hasan al-Banna, and Moroccan Islamist leader Nadia Yassine, as well as the Hamas charter, an interview with a Taliban commander, and the final testament of 9/11 hijacker Muhammad Ata. Illuminating the content and political appeal of Islamist thought, this anthology brings into sharp relief the commonalities in Islamist arguments about gender, democracy, and violence, but it also reveals significant political and theological disagreements among thinkers too often grouped together and dismissed as extremists or terrorists. No other anthology better illustrates the diversity of Islamist thought, the complexity of its intellectual and political contexts, or the variety of ways in which it relates to other intellectual and religious trends in the contemporary Muslim world.

Islamism and the adherents to the ideology, so called "Islamists", is concept that is currently breaking through esoteric usage and beginning to enter common parlance. What this book does,
and beautifully at that, is introduce the reader to the political, theological, and philosophical foundations of the proponents of Islamism. The beginning part of the book explicates the contemporary arguments advocated by the founder of the Muslim Brotherhood, Hasan al-Banna, and follows that up with his disciple Sayyid Qutb. These communications have normally been limited to Arabic speaking audiences and the author has translated the original sources in such a manner that clearly and succinctly displays the passion, vigor, and rigor of the original ideology. Later in the book, issues such as the political context of Islam are debated, followed by gender issues in the Islamic context, then issues on fighting, and lastly violence. The last section is probably the one I have the least interest in, and this kind of subject matter in generally not pleasant to read. Some of the segments will be uncomfortable for some, and I would not consider this book a candidate for a "pleasure" read. Nonetheless, this is a valuable contribution to an important and relevant topic. I would assume that this book is not for the casual reader. It is a treasure of original sources translated into English and would be best utilized by those with a moderate background, and appreciation of, Islamic thought. I found the introductions in each of the segments to be invaluable and elucidating. While remaining short, they will walk the reader through the necessary historical background of the relevant author, and give you the requisite information needed to properly frame the proceeding material. Overall this book is a real gem to the researcher and scholar of Islamic thought, an invaluable reference for those of us who do not at present understand the Arabic language.

I absolutely loved this book. It is primarily a collection of translated works written by influential Islamists. The book itself, and every section is introduced by the two editors of the book and is heavily sourced and footnoted and detailed in its analysis making the book an excellent reference resource. I only really had two "complaints": the first was that, despite its already considerable length, I would have liked it to be longer and more encompassing. The second is that I would love to see an updated edition now that Osama bin Laden has been killed and Zawahiri is at the helm of Al Qaeda. It would also be great to see works on Al-Baghdadi, and Muhammad Yusuf, as well as the new wave of internet Islamists. The book does much to showcase the differences in the roots of modern Islamist discourse relative to traditional Islamic practices and discourse, with a particular emphasis on the seemingly anti-scholar rhetoric that many Islamists have come to utilize and come to rely upon to justify their own lack of formal religious education.

In my mind, required reading in this day and age. Especially via reading Qutb and Al Banai it is clear
that an influential number of thinkers believe: 1. The west is morally corrupt 2. It is time to move from defense militarily to offense militarily 3. All man made institutions must be "destroyed" for Allah to rule. It is not an exaggeration to say: This is Mein Kampf for the present day. It is impossible to say we did not know, we did not hear. High time the Western World ceased behaving like ostriches.

If you are interested in the Islamists phenomenon, you should really read this. This book has a lot of works from Radical Extreme Muslims; however, it also has works from the founders of the Islamist movement. It is a great and informative book. My only complaint is the introduction was very dry and it wasn't really needed. Other then that though this book is great for an inside perspective of an Islamists.

Nice starting book for people interested in modern Islamism. The selection of articles are quite comprehensive.
